

2025 Green Future<sup>SM</sup> Choice and Green Future Block prospective product content label<sup>1</sup>

Green Future Choice will match 73% of your monthly electricity use. Green Future Block is sold in 200 kilowatt-hour (kWh) blocks. These are Renewable Energy Certificate (REC) products and do not contain electricity, which is billed separately.

A REC represents the environmental benefits of 1 megawatt-hour (MWh) of renewable energy.

Here’s how that compares to the average mix in the 2024 PGE Basic Service Mix:<sup>5</sup>

GENERATION LOCATION

Wind: AZ, CA, CO, ID, MT, NM, NV, OR, UT, WA and/or WY  
Solar: AZ, CA, CO, ID, MT, NM, NV, OR, UT, WA and/or WY  
Low impact hydro: OR, WA and/or ID

40% Natural gas	21% Hydro <sup>6</sup>	14% Wind
15% Other unspecified <sup>7</sup>	5% Coal	5% Solar

Green Future Choice and Block price, terms and conditions

Portland General Electric	
What is my contract length?	Your Green Future Choice and/or Block contract is month-to-month.
How will I be billed?	Your Green Future Choice and/or Block charge will be listed as a separate line item on your monthly PGE bill. This charge is in addition to your regular electricity bill.
How much will Green Future Choice cost?	Green Future Choice costs \$0.0094/kWh in addition to your Basic Service rates. Green Future Choice will match 73% of your monthly electricity use.
How much will Green Future Block cost?	\$1.88 per 200 kWh block of Green Future Block. You can purchase as many “blocks” as you’d like, with a minimum purchase of one block.
Will my rates change over time?	Green Future Choice and Block prices are based on current Oregon Public Utility Commission approved tariffs. Pricing is subject to change. All price changes require approval from the OPUC. You will be notified of any price change in advance.
What other fees might I be charged?	You must also pay all applicable federal, state or local taxes.
Can I cancel my participation?	You can cancel at any time with no fee. There is no minimum contract length.

The average home in the United States uses

855 kWh per month.

PGE, P.O. Box 4404, Portland, OR 97204

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary from those filed with Oregon DEQ according to resource availability. Wind and solar percentages could vary +/- 10%. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New renewables come from generation facilities that first began commercial operation within the past 15 years. These percentages are averaged annually.

3. The Wheatridge Renewable Energy Facility, owned in part by PGE, is supplying a portion of the wind and solar RECs projected above.  
See [portlandgeneral.com/wheatridge](http://portlandgeneral.com/wheatridge) for info about this facility.

4. Hydroelectric facilities include facilities certified by the Low Impact Hydropower Institute (LIHI) ([lowimpacthydro.org](http://lowimpacthydro.org)) or EcoLogo ([ecologo.org](http://ecologo.org)) and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

5. These figures are preliminary and based on generated and purchased energy associated with serving retail customers within the state of Oregon, as required by Oregon DEQ. Some or all of the renewable energy attributes associated with PGE’s Basic Service Mix may be sold, claimed, or not acquired.

6. Hydro includes power purchased from Bonneville Power Administration (BPA).

7. “Other” fuels may include biomass, biomass gases, landfill gas or other fuel types, including certain emissions-free sources that do not meet Oregon DEQ requirements to qualify as “specified purchases.” PGE presumes the resources are not emissions-free.
